Mar. 11							

0. These are maximums - the senior athletes should be at the top end; the beginners will be much less than the top end
1. Numbers are minutes running - run at a comfortable pace unless otherwise specified (i.e. Tues, Thursday, Sat are workout days when you are running faster)
2. 10 x 1/1 - 10 one minute runs hard with 1 minute jog in between
3. Run the first 50% to 60% fairly ez, gradually pick up the second half of the run. Should be running 5 km pace by the last few minutes
4. Hill sprint - a 10 to 12 second sprint up a fairly steep hill - walk back down very slowly in between - good recovery between reps
5. Xtrain = something aerobic like swimming, elliptical, stationary rowing or exercise bike for up to 30 minutes
6. Weights - good idea to be in the weight room 2 or 3 times a week (avoid Tuesday and Thursday b4 workouts if possible). Weights are supplementary - don't compromise your workout
7. Morning runs (Senior athletes) - Nothing wrong with running an ez 20 or 30 minutes Tues morn, Thursday morn, and/or Sat late afternoon. Alternatively, you could ez xtrain here instead

DO SOMETHING EVERY DAY TO MAKE YOU A BETTER ATHLETE ... even if that means a rest day
